Continuing Education

This program is approved
for 6 CEs for psychologists.
See back page for details.

ICD Diagnosis and DSM Changes: A New Horizon

This program offers an overview of the World Health Organization's International Classification of Diseases (ICD); an introduction to the ICD-10-CM set of diagnostic codes that will be required for billing and health information in the U.S. on 10/1/2014; participant opportunity to practice using the new code set; and a preview of ICD-11 which is currently under development. Major changes in DSM-5 are introduced. The relationship of the ICD classification to the DSM classification is discussed and contrasts between the two systems are presented.

Learning Objectives

At the end of this presentation, participants will be able to:

1. Describe the purpose of diagnostic classification systems.
2. Identify the two HIPAA approved code sets for the United States.
3. Understand the coding format of the ICD-10-CM.
4. Transpose the three most commonly used diagnostic codes in their practices now to the new ICD-10-CM codes.
5. Describe 3 major changes in the DSM-5.
6. Describe the relevance of the new codes for their health care practices.
7. Identify the most important feature for clinicians in the ICD version that follows the ICD-10-CM, the ICD-11
