Continuing Education

This program is approved
for 6 CEs for psychologists.
See back page for details.

The Nebraska
PSYCHOLOGICAL
Association

WISC-V: Clinical, Psychometric, and Practical Advances in Traditional and Digital Versions

The WISC-V represents a major revision with new content, six new subtests and a new test structure aligned to five clinically and theoretically driven factor-based index scores. The WISC-V can be administered in multiple formats (traditional and digital) and offers numerous ancillary scores for special clinical purposes. The presenter of this workshop will provide in-depth didactic instruction, demonstrations using the digital format, and some hands-on experience as time permits.

Learning Objectives

At the end of this presentation, participants will be able to:

1. Describe the revisions and changes to the WISC-V, including the addition of a new digital format on Q-interactive.
2. Describe the rationale and constructs measured by six new subtests.
3. Administer and score six new subtests and adjust administration and scoring techniques for revised subtests.
4. Analyze and interpret the WISC-V profile at the primary index, subtest, and ancillary index levels.
5. Interpret WISC-V data to understand a student's strengths and weaknesses.
6. Describe the statistical links with the KTEA-3 and WIAT-III.

Workshop Schedule

(Please note all times are CST)
